

Tony Kearney FCCA, MAICD

Tony is a member of both the Australian Institute of Company Directors, and the Chartered Association of Certified Accountants, the largest international professional accountancy body in the world, with membership spanning 180 countries.

He is the principal of Lansdowne Financial Pty Ltd, an organisation that focuses solely on providing resident director services and local support to overseas businesses, with many of these roles undertaken by Tony personally.

Born in Dublin and having spent a decade in senior finance roles in Ireland, Tony moved to Australia where he worked as CFO to two global manufacturing companies ICI and Avery Dennison.

During this time, Tony participated in over a dozen mergers, acquisitions and divestments and personally led the cross-functional business integration or restructure on each occasion. A seasoned CFO, Tony was involved in all aspects of strategic planning, business strategy and operational management, with his brief often extending to non-financial roles as a key member of the senior management team.

Tony currently leads the Finance function in Northern Sydney for the government-run Mental Health sector spanning four public hospitals and several community facilities, where he contributes to strategic planning and development of the overall health district – a significant organisation with more than 12,000 staff and a budget exceeding A\$1.6 Billion.

With a passion for business innovation and growth, coupled with broad senior level CFO experience gained on both sides of the world, Tony's background leaves him uniquely placed to better understand the needs of overseas-based businesses looking to develop their Australian operations, providing sound commercially-based advice and local support as required, always adding considerable value to the resident director role far in excess of basic legal requirements.
